

InterGroup Mining Limited  
("InterGroup" or "Company")

## **Appointment of Investique to lead AUD1m raise for Lithium Exploration, Completion of Listing Process and Start of Kaolin Production**

InterGroup Mining, the Australian company focused on exploring and extracting minerals essential to delivering net zero emissions, is pleased to announce the formal appointment of Investique to complete a AUD1m raise from the UK. The funds will be used to:

1. broaden the scope of IGM's 2024 exploration programme at Brumby to include Lithium, Kaolin and Niobium;
2. continue current acquisition opportunities as well as the start of Kaolin production;
3. ensure the Company fully meets its working capital requirements and is ready for the imminent listing;

Joe Coggings, Founder & CEO of Investique commented:

"The recent drilling reports show that InterGroup Mining is not only a future mining heavyweight but also a major player in the next generation of green mining & exploration. With the latest reports being completely, it's extremely exciting that the Brumby site has excellent grades of gold but also multigenerational levels of pure Kaolin, Lithium, Tantalum and Niobium. With these 5 core REE materials, it's no surprise that InterGroup Mining has attracted increased and high levels of interest from the world's largest mining conglomerates & sovereign wealth funds. 2024 looks to be the best yet for InterGroup Mining with this ever growing interest from the worlds largest players and a listing on an internationally recognised stock exchange. All at Investique are impressed by their ability & knowledge in this ever growing market as well as detailed plans for the future and now."

For further information on Investique's appointment and services, please contact [info@investique.co.uk](mailto:info@investique.co.uk)
